

EDD file is used for Siemens Device Management Software--SIMATIC PDM. Because Microcyber isn't listed in the software, the user is requested to add Microcyber.

Find "manufacturer.csv" in the path of ...\\Siemens\\Step7\\S7BIN

Open and add two lines:

***Microcyber Inc.;;http://www.microcyber.cn/;;;MICROCYBER;0x016C***

***Microcyber;;http://www.microcyber.cn/;;;MICROCYBER;0x016C***

Note: Please open the file in "notepad", rather than "Excel".

Or, the user may use the file with the same name (**manufacturer.csv**) in EDD folder to replace. But there is a disadvantage, it will probably add Microcyber, and delete other manufacture info at the same time. So we recommend the user to add manually.

Then the user shall install EDD file, choose Start List " ->SIMATIC->SIMATIC PDM->Manage device catalog", and choose EDD folder, to load EDD file to related device.
